INTRODUCTION

❖ OfficeLabs - Company Overview

After more than a decade of significant technical and commercial experience and successful, long-term relationships with large public and private sector organisations, we can proudly say we are the go-to information management systems consultancy for businesses that want a provider who can cut through jargon, and simply deliver.

❖ Message from Graham

“We focus on offering the best information management, governance and compliance tools in the industry. If you need a portal, intranet or any other mechanism to communicate, collaborate and share information, then get in touch today”

Information Management Products

Best-in-Class Productivity for the Modern Business

✓ FastTrack SharePoint

Our Fast-Track SharePoint is an out of the box Intranet built on standard Microsoft SharePoint components that will remain compatible with Office 365 as updates are released.

✓ LiveTiles for SharePoint

LiveTiles for SharePoint from OfficeLabs creates an all-in-one solution for content, collaboration and integrations. Create beautifully engaging sites on SharePoint, Office 365 and Azure.

✓ Gimmel Records Management

Gimmel RMS offers a robust information management suite which works in conjunction with your out-of-the-box Office 365, on-premises or hybrid SharePoint build to provide a comprehensive set of records management tools that plug many of the gaps in SharePoint's functionality.

✓ Gimmel Document Management for SAP

Gimmel Document Management for SAP puts critical business information where people work, allowing users inside and outside of SAP to collaborate on document-centric processes. It transforms SharePoint and SAP into a unified enterprise information platform while saving you time and money.

WHAT CAN YOU EXPECT FROM US?

- ✓ A clear understanding of your IT and business goals
- ✓ A strategy for your information management requirements
- ✓ A project plan to build a new way of working
- ✓ A commitment to exceed your expectations

“OfficeLabs help build better businesses by streamlining processes and decision making. We do this by improving the way that information is stored, shared and managed. We're Microsoft specialists and we help organisations of all sizes bring people, technology and information together efficiently.”
